

*The WebTMS trademark management systems have useful features which no other systems have; for example*

## **Integrated Scanned Documents**

You can attach any number of scanned documents, digital camera images, pdf or Word documents to any record in any module of the IPPO WebTMS system.

For a trademark record, keep images of the

- filing receipt
- Journal publication notice
- letter of acceptance
- registration certificate
- renewal certificates
- Affidavits of Use
- sample labels
- product packaging
- product advertisements
- any other critical document

For an Infringement record, keep images of

- infringing product packaging
- your client's packaging
- Cease and desist letters
- Court orders
- Settlement Agreements

Scanned documents are available at the click of a button, for full screen viewing, or printing, in both the client/server and the browser based systems.

The Scanned Documents Wizard enables you to search for documents throughout all modules by description and other criteria

WebTMS is a state of the art browser based IP management system using a Microsoft SQL Server database manipulated by web pages
